## EXPERIENCE

### Student, Alchemy Code Lab

April 2021-October 2021

- 800+ hour intensive full-stack coding school.
- Remote collaboration via Git and team/pair programming experience.

## PROJECTS

### New Growth PDX →

React - Node.js

- Lead the front-end UI/UX development. I utilized Tailwind CSS to develop a modern and responsive design.
- Managed state with custom React hooks.

### Brewster API →

React - Node.js

- Created a RESTful API for users to search various coffee drinks.
- Developed a SQL schema with full CRUD routes for users to favorite, update and delete drinks from their profile.

### Birdzai Bird Watching App →

React - Node.js

- Integrated Google Maps API to render recent bird sighting data pulled from eBird's API.
- Lead the front-end design, navigation, login, map and watchlist CSS.

## EDUCATION

### Alchemy Code Lab

Full-Stack Engineering  
October 2021

### Towson University

B.S. E-Business  
December 2015
