EXPERIENCE

Duggal Visual Solutions

Oct 2019 – Mar 2021 | Shipping Specialist

- › Utilized shipping management software to record tracking numbers and communicate with other departments.
- › Responsible for packing artwork and preparing orders for domestic and international shipping with a high rate of accuracy.
- › Developed innovative packing strategies to cut down on man-power, material costs, and waste.

Pacific Prep Services

Oct 2017 – Oct 2019 | Warehouse Operations

- › Hired, trained and provided support to 4 employees who were responsible for receiving and prepping client orders.
- › Managed client's account inventory and orders on platforms such as Amazon Seller Central, eBay, Shopify, and Etsy.
- › Scheduled large pallet-sized freight shipments to Amazon's warehouses that were cost effective for my clients.

ABOUT ME

Full-stack software engineer with a drive to build elegant and effective cross-platform web applications. Seeking a position in a collaborative and dynamic environment where I can continue to learn. Specific fields of interest include React, e-commerce, and web3.

PROJECTS

New Growth PDX ↗

2021 | Node.js • React.js • Tailwind CSS

Website for Portland, OR based houseplant lovers to share their collection with other plant lovers. Users have the option to message other users to trade or buy plants. *I primarily worked on the front-end and utilized Tailwind CSS to develop a modern and responsive design. I also utilized React Hooks to create a state management system.*

Brewster API ↗

2021 | Node.js • React.js • Tailwind CSS

RESTful API with CRUD routes setup for users to search various coffee drinks and add favorite, update and delete from a SQL table. *I researched and implemented Tailwind CSS on the front-end to display the API fetch requests. Agile development was practiced during this 14 day sprint.*

Birdzai - Bird Watching App ↗

2021 | React.js • APIs

Web application with Google Maps integration enabled users to view recent local bird sightings. Icons are rendered to a map from a fetch request to a bird observation API. *My team worked with a scrum framework and utilized a kanban board.*

EDUCATION

Alchemy Code Lab, remote

Apr 2021 – Oct 2021 | Software Engineering

Alchemy Code Lab is a 800+ hour intensive full-stack, remote coding school. While studying there, my daily schedule included test-driven code challenges, live lectures, practice labs, and team projects.

Towson University, MD

2013 – 2015 | Bachelor's Degree in E-Business

Rutgers University, NJ

2010 – 2012 | Business, General Studies
